Office of the Inspector General of
Education in Mysore,
Bangalore
20th October 1909

13

Dear Sir,

With reference to your D O letter no 3313 dated 7th October 1909, I beg to enclose a list of some educational books of which the Copyright was purchased. There are no files relating to the purchases as the Inspector General used to sanction the purchase after consulting informally if necessary the Translator and one or more members of the Text book Committee. The reasons for fixing the value of the Copyright were different in each case, as the importance or usefulness of the book, the amount of learning or previous study it required, the educational qualifications and position in service of the author, the amount of profit which the author would get if he sold the book on his own account &c. In my opinion which is endorsed

7
by the Translator, Mr. Venkatasubbaya deserves a
grant of Rs 500 for the Copyright of his book, in other words
for writing the book, which I consider to be of great use
to all Vernacular Schools

Yours sincerely

H. Shastri

The book is one for use by
pupils in schools but by teachers
who wish to practice them and
with success - Thus it is doubtful
that it is one the Copyright of which
Govt need acquire - Would it be
sufficient

Serial
No

Sufficient if we purchase a
number of copies when the
book is printed? *Wm*
26 Dec 1897

18 It is respectfully submitted that a book which ~~the proposed~~ schoolboys will have to buy will command a large sale & will remunerate the author to a larger extent than a book like the present one meant for the guidance of teachers. It is principally in Govt schools that Kindergarten methods will have to be largely introduced & it is desirable that Govt should provide adequate facilities for teachers, learning the methods well.

✧ Good Metal and Perfect Alignment

OUR Type Foundry is under the supervision
of the English Master by whom all type
must be before being set out

Most of our future credit on the point
system which has now been generally adopted
by European and American typefounders

Our type is made to do good work and to
last a long time. BEWARE of buying cheap
and worthless type made with inferior metal
without regard for alignment. Such type will
wear out quickly and no good printing can ever
be done with it

THE INTRODUCTION OF TYPOGRAPHY[▲] started a controversy around its cradle lasting for four centuries volumes have been written fortunes have been wasted societies have been organised communities have been stirred a literature has been developed to find an answer to the famous triple question when where and by whom was found out the very useful art of book printing? and yet the world to day is little nearer a finite answer to the unsolved question while indeed the dust of battle has greatly increased rather than diminished those mysterious clouds which envelop this great problem It would not be suitable or profitable to encumber an investigation of that important part of the history of typography which relates to the type and type making of the fifteenth by an attempt to discuss the perplexed quest

Secretary to the Government of M P the Maharaja of Mysore
General and Revenue Departments, Bangalore

SIR

I have the honour to inform you that Mr Venkata Subbaya
B A , L T , Assistant Master Normal School Mysore has written a
valuable book for Kindergarten instruction in Kannada. If this in-
struction is to take root in the Vernacular Schools of the State
then like this is absolutely necessary. It is probably the best or
one of the best books ever written in any Indian Vernacular on
Kindergarten principles and methods and ^apractical instruction suit-
able to Primary Schools. I strongly recommend that the copyright
may be purchased by Government for Rs 500/- to be paid to Mr —
Venkatasubbaya from the provision for the encouragement of authors.
The manuscript copy of the book together with a copy of the review
thereon by Mr Hiriyanna A, L T , is herewith sent. The man-
uscript may be kindly returned when done with.

I have the honour to be,

Sir,

Your most obedient Servant,

H J Bhabha

Dear Sir

I beg to return to day,
by Registered Post, Mrs. Venkata Subbanga's
book on Kindergarten which you sent
me for review some weeks ago. I have
read the book and I find it very useful
to teachers of Vernacular Schools. The
arrangement of the subject is very
much on the lines indicated by the
late Mrs. Latta in her syllabus of
lectures and the treatment is through-
out full and lucid. Before explaining
the merits of the Kindergarten, Mrs. Venkata
Subbanga gives a brief account of the
educational work of great teachers
like Pestalozzi and Froebel. This is a
necessary preliminary to the exposition
of principles, and the life of Froebel, in-
cluding as it does a summary of the
teaching of his "Education of Man"

will, in particular, be found stimulating and suggestive by the Vernacular Teacher. The principles governing infant education, as now understood, are clearly set forth and the book dwells at due length on such points as the importance of manual occupations, the need for making nature-teaching the central lesson in early training, and the inter-relationship that should exist among the several lessons taught at a time. In addition to dealing with the mere theory of the subject, the book gives practical instructions regarding the manipulation of the various kinds of kindergarten material. It also contains specimens of 6 nature-study schemes fully worked out and describes, in detail, the gifts and occupations devised by Froebel and his successors. Another useful feature is the comparatively

4
large number of illustrations found
in the book

If the new method of education
is to become naturalised in this country
it does not appear enough that a
few English-knowing teachers only
should follow it in their schools
The ablest among our vernacular
teachers should get a proper con-
-ception of it and put it into
practice in the right spirit. There
are various means of making these
teachers conversant with the aims and
methods of Jacobel and the publication
of a correct and comprehensive
treatise on the subject in Kannada
is one of the most important of
them. Mr. Venkata Subbaya has
succeeded in writing such a
book and I consider it to be
quite deserving of encouragement.
I have a few minor alterations

5
to suggest and I note them on the
next page

I remain,
Yours obediently
(Signed) M. Hanyama

"True copy.."

W. Bhabha
Inspector General

- 1) The word ~~to~~ is commonly used to begin by idealised emotion as it appears in works of art ^{and} cannot stand for feeling
- 2) The short paragraph on Swedenborg contains little that is useful and may well be left out
- 3) The censure ^{on} Rousseau may also be omitted on the reason for passing. Such censure has to be noted
- 4) The second of the reasons ~~in~~ accounting for the name "Hundredparten" does not appear to be supported by authority and may be left out
- 5) A reference may be made to the fact that a great variety of forms of Beauty can be constructed with the aid of eqts III to VI
- 6) The book deals with infant Education and all reference to

the methods of teaching advanced portions of History and Geography may therefore be left out

7) The MS seems to have been written by an amanuensis and the spelling of certain words and the punctuation have to be carefully seen while passing the proofs

SIR

In reply to your letter No 2784/Edn 81-09-2 dated the 20th September 1909, requesting to be informed how many pages " kindergarten Instruction " by Mr Venkatasubbaiya in Kanarese would come to if printed in ~~XXXXXXX~~ demy octavo size, I have the honour to inform you that it is estimated to come to about 250 pages in pica Kanarese, the smallest type we have

Although you do not ask for an estimate of the total cost of producing such a work, I have estimated the approximate cost to Government to amount to Rs 1,250 This includes cost of process blocks, compo~~s~~ing, printing, binding, etc The estimate is based on an edition of 1,000 copies I have estimated it for royal octavo size and not demy octavo size as requested, as we have already some of the blocks in use for the English edition which are made for royal octavo I return the manuscript book herewith

I have the honour to be,

Sir,

Your most obedient servant,

INSPECTOR GENERAL OF EDUCATION IN MYSORE,

BANGALORE / 2-10 190

18-

From

M^r M Venkataswamy

Assistant Master

Normal School, Mysore

To

1 Wm Esq. M A

Inspector General of Education

in Mysore Bangalore

SIR

With reference to your despatch N^o 7283/1197 of 25-1-0 enclosing a copy of Government order N^o 6077/Ed 87-09-4 of 21-1-10, about the manuscript copy of a book on Kindergarten Instruction written by me, I beg to state that, on enquiry, at the Wesleyan mission Press I find that the estimate of Rs 550 prepared by the manager for printing 500 copies of my book does not take into account the cost of the blocks that will have to be made for illustrating the book. There are about 60 photographs in the book and blocks have been made from 40 of these for purposes of illustration in Vols I & II of "Kindergarten Instruction, in Mysore, (two Government publications in English)

to which purpose I lent the photographs to Government I pray the Government to lend these blocks for my work, after they are used, in the Government publication

In addition to these A O blocks, there are still 20 blocks to be made, and they will cost about Rs 150. Hence I request the Government to lend me Rs 700/- to enable me to print my work. I think the sale of this book will rather be slow, the book being useful only to teachers, and I therefore request the Government to allow me to pay back the loan in three instead of two years.

Though the copies of the work may be considered as security for the loan, I pray that I may be permitted to sell them during these three years so as to enable me to repay the Government loan. If at the end of the period any portion of the loan remains unpaid, I shall undertake to pay back the loan, either in the shape of money or of copies of my work, at Rs 1/- per copy [and if during these three years, the Government require copies for use in their schools, I shall undertake to supply them at the rate quoted above though I may put a higher value upon copies I sell to the public] I beg the Government to sanction the loan on these terms so as to enable me to print my work immediately, and I pray that the manuscript copy of my work be

17
returned to me so that I may send it to the Press
I request you to, recommend these terms, for the
favourable, consideration of the Government

I beg &c
